very gentle sway

begin to increase in intensity

begin to decrease in intensity

Take the thunder tube spring between forefinger and thumb nail and 'click' and 'scratch' the spring slowly and freely. Allow the reactive pressure of the spring to produce the rhythm. Start slowly.

Rapidly slide three fingers up and down the length of the finger holes whilst blowing

to recorder 5' 34" to sinewave generator 1 5' 52" Begin fade in

The woodblock cuts off the recorder

to large thunder tube 5' 32" Sway, stronger this time. to woodblock to sinewave generator 2 Begin fade in
